

NOTE TO PATIENTS REGARDING **REFERRALS**

Please be advised that patients are responsible for managing their own referrals and making sure they are covered at the time of service. Our office, as a courtesy, will be able to provide (upon verbal request only), the referral start and end date, to assist in helping determine when referrals will expire. This will allow you, as the patient, to request a new referral or extension in a timely manner. Patients are responsible for communicating with their own primary care physicians and/or insurance companies.

We thank you in advance for your understanding and support!
